

Program: MDP 09/10

Project: ALL MARKET ACCESS

Recipient: Canada Wood Group / Groupe du Bois du Canada

EXECUTIVE SUMMARY

Canada Wood Group will address phyto-sanitary market access issues as they relate to various destinations of wood products from British Columbia as well as obtaining international accreditation through the intermediary of the International Accreditation Forum (IAF) to make it easier for Canadian lumber producers to enter global markets.

A key element of the program is to undertake pro-active research into the development of alternative pasteurization options for forest products.
