

*Representing the Canadian Forest industry in China, Forestry Innovation Investment China in cooperation with Canada Wood China (known collectively as the China Enterprise (“CE”)) are working together to build opportunities that advance Canadian wood use in China’s construction sector to increase the export of high value wood products to China.*

## **Policy Advisor – Shanghai, China**

Recent changes to government policy in China designed to address China’s concern over greenhouse gas emissions, energy consumption, life-cycle assessment and the need to advance green and energy efficient building practices has opened up a career opportunity in CE’s offices in Shanghai. We are pleased to offer a two year (renewable) employment contract opportunity in Shanghai, China for Policy Analyst to provide quantitative and analytical data to validate wood construction opportunities that support climate change policies and investment decisions in China.

As part of the Government Relations team, the Policy Advisor plays an important role in providing advice and ideas to validate wood construction opportunities that support climate change policies and investment decisions in China. The Advisor will also coordinate all policy work by leading information sharing, educational sessions, and policy discussions to articulate the benefits of using wood in a low carbon construction sector and generate insightful advice for strategy development and external communications.

We are looking for someone with a Master’s degree or PhD in an environmental or science field with five to seven years’ experience in research and/or an environmental policy related position to support our business development team in China. The ideal candidate will have experience working in energy/carbon management and research as it relates to carbon sequestration analysis and life-cycle assessment. Previous experience in developing and delivering statistical analyses that support climate change policies and investment decisions is preferred. Understanding of wood frame construction and Canadian building practices would be an asset. Ability to work in both Mandarin and English (written and oral) are essential competencies for this role.

Interested candidates are asked to view the detailed job description and qualifications at [www.bcfii.ca](http://www.bcfii.ca) (under About Us – Contract and Employment Opportunities.) Please submit your resume and cover letter electronically along with salary expectations to Nansiang.Lim@bcfii.cn before October 1, 2018.
