

Request for Proposal FII-25-01 Mexico Market Research Report

Addendum #2 – August 23, 2024

Answers to Questions received as at August 23, 2024

This information is posted on both <https://www.bcfii.ca/contract-opportunities/> and <https://bcbid.gov.bc.ca>.

Q1: Does component 6 of the scope of work “6. Wood in Manufacturing” refer to the BC’s wood manufacturing sector or to the Mexican wood manufacturing sector?

A1: By wood in manufacturing, we mean furniture being manufactured in Mexico for use within Mexico itself or for export. We also could include doors, door frames manufacturing as well as interior fit out applications such as panelling, moulding and interior use in residential or tourism and hospitality sectors.

Q2: Would you like the final report to include a section specifically addressing the best trade opportunities that the Mexican market offer specifically for those wood products from British Columbia’s Forests?

A2: We would like an in-depth analysis on the opportunity for all wood products- i.e. solid wood for the Mexico market. Should you choose to add in a section on best trade opportunities for BC wood products it should be added in as an opinion and not form the main part of the report.

Q3: Could you please clarify what type of project examples FII would prefer? Should we provide a simple reference, an executive summary, or a complete final project delivered?

A3: We are open to submissions that best suit a proposal in your experience. Similar research projects conducted would be ideal. You can choose to provide finished examples, or executive summary . Additionally providing information on the consultants and contractors and their work experience in the field and knowledge and expertise would be required.
